

Micro- and Nano-satellites for space exploration

Total solution for satellite's development,
evaluation, launch and application

Overview

It is ready to provide the technology package for Micro- and Nano-satellites around the earth, including know-how of hardware, operation software, evaluation technique, man-made satellite launching system, (a part of IP right of) termination control technique (de-orbit from orbit when missions finished). It is also possible to provide unique service by using the small satellite technologies to conduct customer designated missions.

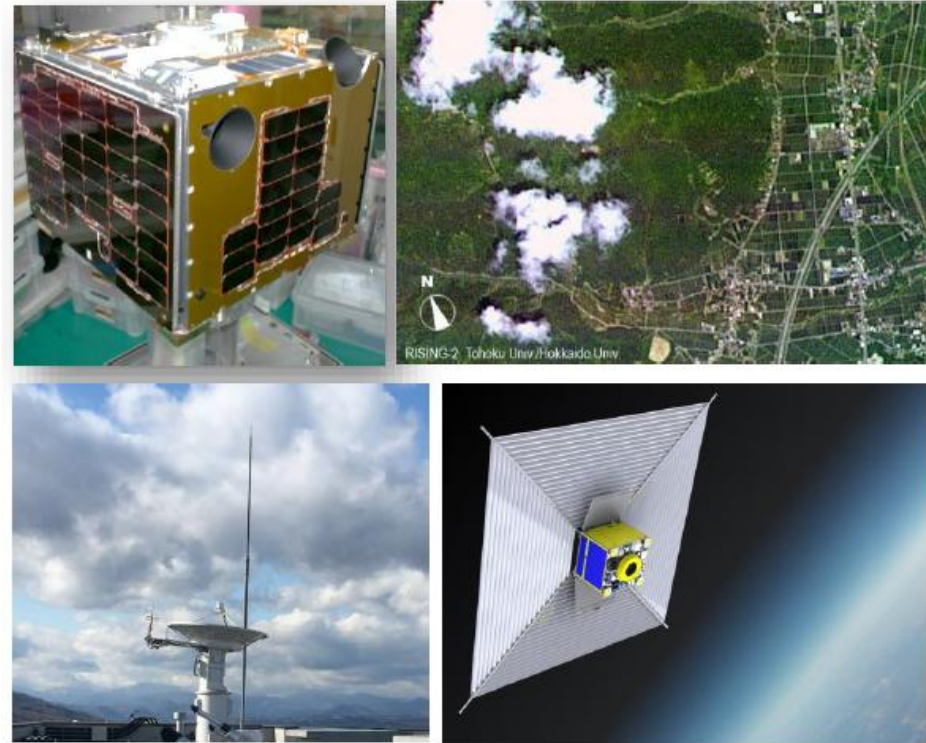

Product Application

- Applicable for the following types of satellites:
- Meteorological / Earth observation satellites
 - Communication satellites
 - Other satellites
 - Space probes

IP Data

IP No. :
Inventor : YOSHIDA Kazuya, KUWAHARA Toshinori
SAKAMOTO Yuji
Admin No. : S19-009
